PROFILE

I consider myself a highly motivated person, eager to accomplish all my objectives. Over time, I have acquired the ability to cope in difficult situations like dancing in different stages for example. By experiencing different kinds of full-time and part-time jobs, in recent years I have observed an improvement in my quality to collaborate with diverse groups of people by working in small scale teams.

EXTRA-CURRICULAR ACTIVITIES

♣ WebDev Learning Program   Nov 2022 — Present
Naggaro   Brasov

Recently I was accepted for a Web Development Remote Learning Program at Naggaro in Brasov.

My goal is to become a Full-Stack developer so I started a few projects within HTML, CSS, JavaScript, and Java.

https://www.nagarro.com/learning-programs/romania

My progress with the course is on my GitHub account.

PERSONAL PROJECTS

♣ Web Applications

Calculator Web Application

I've made a Calculator Web Application using HTML, CSS. The application also has a simple functionality using JavaScript. My goal was to make it looking as good as possible, with a simple design. The calculator also has a switching theme button for Light/Dark theme using a gradient transition.

The project is uploaded on my GitHub account.

Chat Web Application (backend)

October 2022 - Present

Up until now I have implemented some backend functionalities, establishing the database connection with postgreSQL, made CRUD functions using postman. Currently, my goal is to finish an Angular tutorial and start implementing the frontend part of the application and adding more backend elements.

The project is uploaded on my GitHub account.

Chat Web Application (frontend)

December 2022 - Present

This is also a HTML, CSS and JavaScript application. My goal is to keep a similar simple design as the calculator application, with a dark/light theme switch button. I'm currently working on this project.

The project is uploaded on my GitHub account.

EDUCATION

❖ Transilvania University of Brasov
Bachelor's Degree

Oct 2020 — Present
Brasov

I'm currently studying at Transylvania University of Brasov, Mathematics and Computer Science faculty. As a year 2 student at Computer Science specialization, I started implementing personal projects in addition to school projects and begin a remote learning program at Naggaro company within Web Development.

❖ Colegiul National Octavian Goga

Sep 2014 — Jun 2018
Miercurea-Ciuc

EMPLOYMENT HISTORY

❖ Sales Agent (Part-Time), NextGen Communications/Pro Solutions Agency SRL

Nov 2021 — Present
Miercurea-Ciuc / Ghimbav

I worked until November 2022 full-time and since November 2022 I work part-time 10h/week with a very flexible program and the possibility to quit this job if needed.

Acquired skills: working under pressure, working with several types of mentalities and people, minimal knowledge of networking.

❖ Courier (Self-Employed), Glove

Dec 2021 — Oct 2022
Miercurea-Ciuc

Delivery of goods in a timely manner and on the shortest route possible.

Under pressure working environment. Appropriate behavior with customers.

Acquired skills: acumen, effective thinking, patience.
